SUMMARY

Web Developer & AI Agent Developer at Kargar Business Services, building and deploying production web applications end to end with React, TypeScript, Python/Django, Node.js, and PostgreSQL/Supabase. Experienced in payment gateway integration (ICICI Bank), admin dashboards, technical SEO, and LLM-powered AI agents and workflow automation.

EXPERIENCE

Web Developer & AI Agent Developer Apr 2026 – Present
Kargar Business Services Pune, India

- Own end-to-end development of production web applications — React/TypeScript frontends, Supabase (PostgreSQL) schemas and APIs, admin dashboards, GitHub Actions CI, Vercel deployments, and production debugging.
- Build AI-agent and automation workflows — LLM API integrations, n8n workflow automation, and agent-driven pipelines for SEO audits and code/security review — to reduce manual work across projects.
- Implement technical SEO (JSON-LD, sitemaps, canonical URLs, local landing pages) tracked in Google Search Console.

PROJECTS

Kargar Business Services — Production Website | *React, TypeScript, Vite, Tailwind CSS, Supabase* kargarbusinessservices.com

- Built the company's live website from scratch: data-driven service catalog (hard and soft services) with photography and video, sector pages, a company-profile viewer, and lead-capture forms with source attribution.
- Engineered a review and rating system with filters, sorting, admin replies, and photo/video submissions through an in-browser recorder with device selection, draft recovery, and upload progress.
- Developed a secure admin panel for review moderation, lead management, dashboard metrics, and a media library.
- Designed the PostgreSQL schema (RLS policies, views, triggers, storage) and a build-time SEO pipeline that prerenders routes and validates metadata, canonicals, headings, alt text, and JSON-LD.

Prezenti — Service Booking & Facility Staffing Platform | *React, Tailwind CSS, Django, Python, PostgreSQL* prezenti.com

- Independently integrated the **ICICI Bank payment gateway (Orange PG)**: HMAC-SHA256 request signing, payment initiation, hash-verified return/callback handling, transaction status checks, and reconciliation, with unit tests.
- Developed location-based booking workflows with Google Maps Places autocomplete, geolocation, and serviceability checks, plus site-type scoping, staff and slot selection, and live price quotes.
- Integrated the React frontend with Django REST APIs for OTP/JWT authentication, bookings, GST billing profiles, discounts, and booking/staff-assignment status tracking; built prerendered SEO landing pages with FAQ schema.

Skill Guru — EdTech Platform (In Development) | *React, TypeScript, Supabase, Gemini API* skillguru-india.vercel.app

- Currently building a role-based learning platform with Admin, Teacher, Counsellor, and Student portals for courses, enrollments, messaging, and placements, secured by PostgreSQL row-level security.
- Developing an AI counselling agent on Supabase Edge Functions: Gemini tool calling (knowledge search, lead capture, human escalation), pgvector RAG, rate limiting, and PII-safe logging.

Espacio Design Studio — Architecture Firm Website | *React, Vite, Tailwind CSS, Supabase* espacio-architect.vercel.app

- Built and deployed an architecture firm's website with portfolio and blog pages and a Supabase-backed admin CMS.

VOK & Associates — Chartered Accountants Website | *React, Vite, Tailwind CSS, GSAP* vok.co.in

- Built and deployed a responsive CA firm website with GSAP scroll animations and route-aware section navigation.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, Java, HTML5, CSS3
Frontend: React.js (React 19), Vite, Tailwind CSS, React Router, TanStack Query, Framer Motion, GSAP, Responsive Design
Backend & Databases: Node.js, Express.js, Django, REST APIs, Supabase (Auth, Edge Functions), PostgreSQL, MongoDB, RLS
Payments: Payment Gateway Integration (ICICI Bank Orange PG, Razorpay), HMAC Signing, Callbacks, Reconciliation
AI & Automation: Agentic AI Development, LLM Tool Calling, RAG (pgvector), Gemini API, OpenAI API, n8n Workflow Automation
SEO: Technical SEO, On-Page SEO, Schema.org/JSON-LD, Sitemaps, robots.txt, Core Web Vitals, Local SEO, Search Console
Tools: Git, GitHub, GitHub Actions, Vercel, Postman, VS Code, npm, Vitest, Playwright

EDUCATION & ACHIEVEMENTS

Bachelor of Computer Applications (BCA) 2023 – 2026
Vaidyanath College, Dr. Babasaheb Ambedkar Marathwada University Parli, Maharashtra
Avishkar Research Competition: 2nd Place (District), 3rd Place (Inter-University), and State-Level Representative (AI project)
Certification: MERN Full Stack Development — AccioJob Feb 2026 – Oct 2026
